# Mesaje cheie

## 1. Adultii fac diferenta!

Prin actiunile noastre putem oferi un mediu sanatos si sigur, care contribuie la dezvoltarea sociala si emotionala a celor mici, independenta si responsabilitate.

**Cum actionam?**

## 2. Despre copii

Opiniile copiilor conduc la decizii mai incluzive pentru toti cei vulnerabili. Amintiti-va bucuria voastra sau a copiilor cand au invatat sa mearga cu bicicleta.

**Ne pasa?**

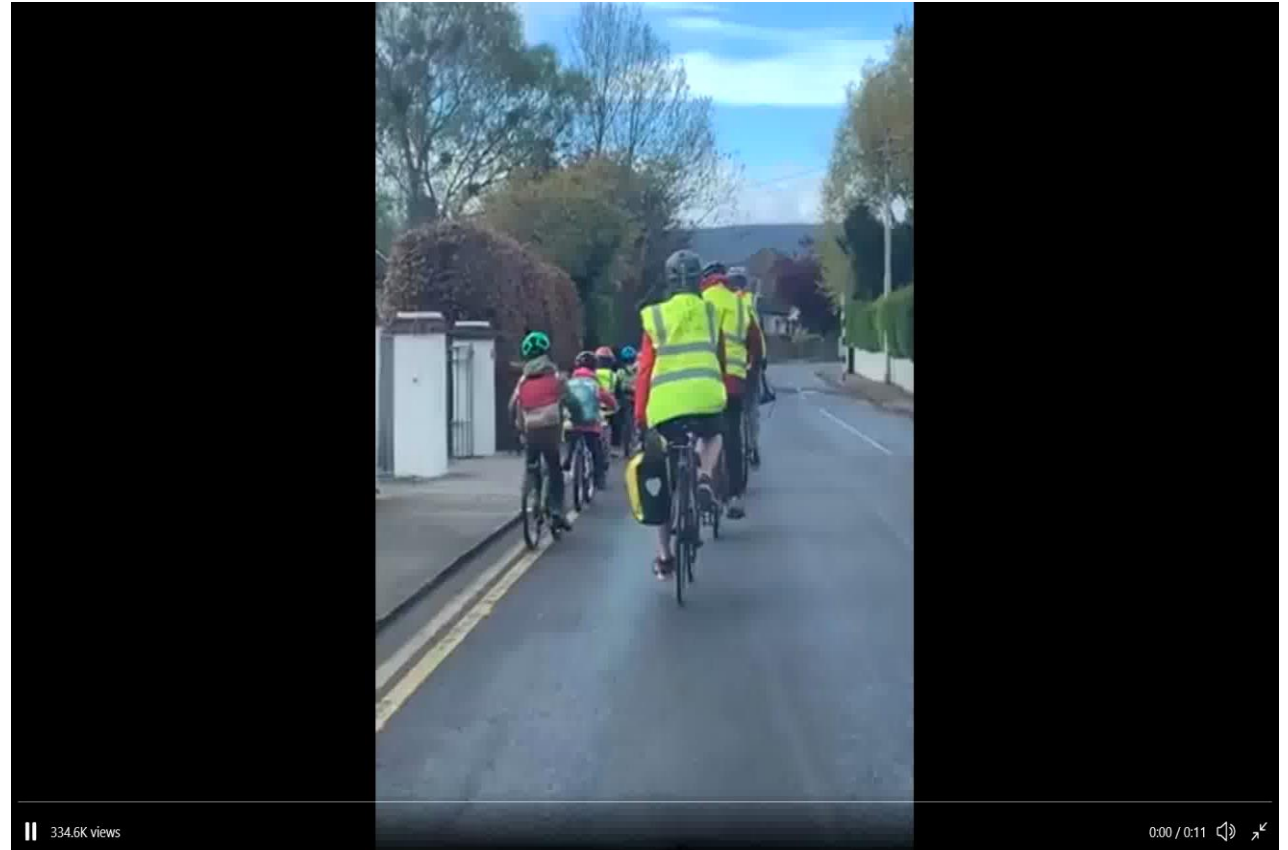

## 3. Despre strazi

Strazile au fost dezvoltate in cadrul unui proces care nu a considerat nevoia pentru transport activ, problemele legate de poluare, congestie, siguranta.

**Cum adaptam sistemul?**

## 1. Adultii fac diferenta!

- **Implicare sociala si asumare individuala**

- Contextul politic

# 1. Adultii fac diferenta!

- **Adaptarea la nevoia de schimbare**

Cyclists must be separated from volume traffic, both at junctions and on the stretches of road between them.

Cyclists must be separated from pedestrians.

Cyclists must be treated as vehicles, not pedestrians.

Routes must join together; isolated stretches of good provision are of little value.

Routes must feel direct, logical and be intuitively understandable by all road users;

Routes and schemes must take account of how users actually behave;

Purely cosmetic alterations should be avoided.

Barriers, such as chicane barriers and dismount signs, should be avoided.

Routes should be designed only by those who have experienced the road on a cycle.

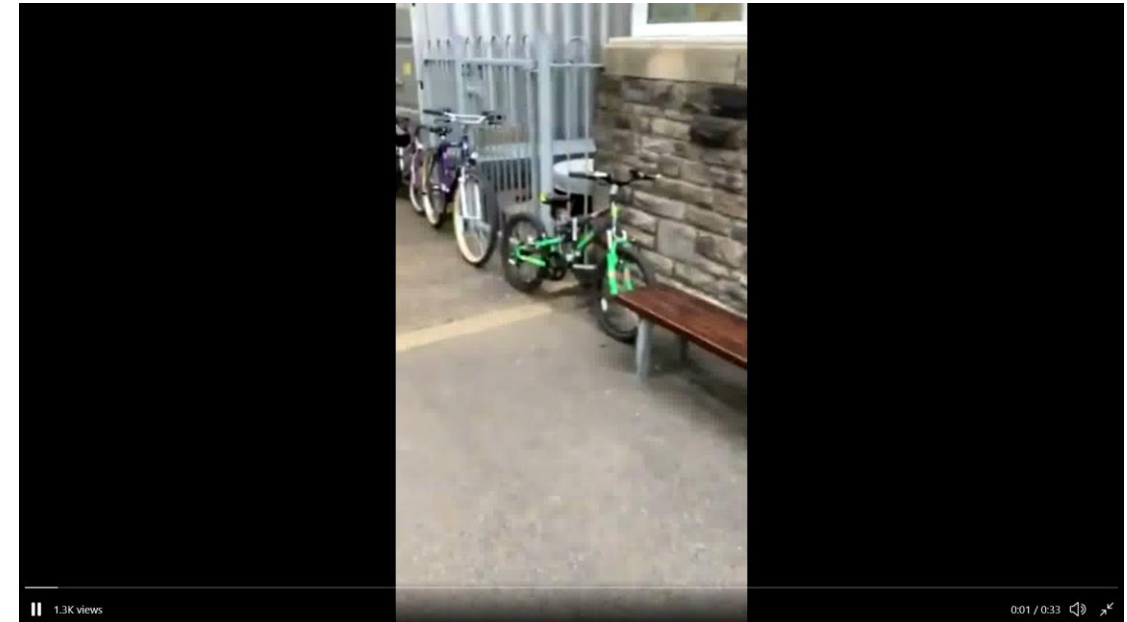

# 1. Adultii fac diferenta!

## 2. Despre copii

Cum lucram cu institutiile de invatamant?

Cum ii pregatim pe copii pentru a minimiza riscurile?

## 2. Despre copii

### Copiii preiau mesajele si cer schimbarea

## 2. Despre copii

Cand desemnam o strada ca fiind sigura pentru copii?

Cum definim siguranta?

### 3. Despre strazi

---

-doar 16% dintre parintii care conduc spre scoala prefera acest mod de transport

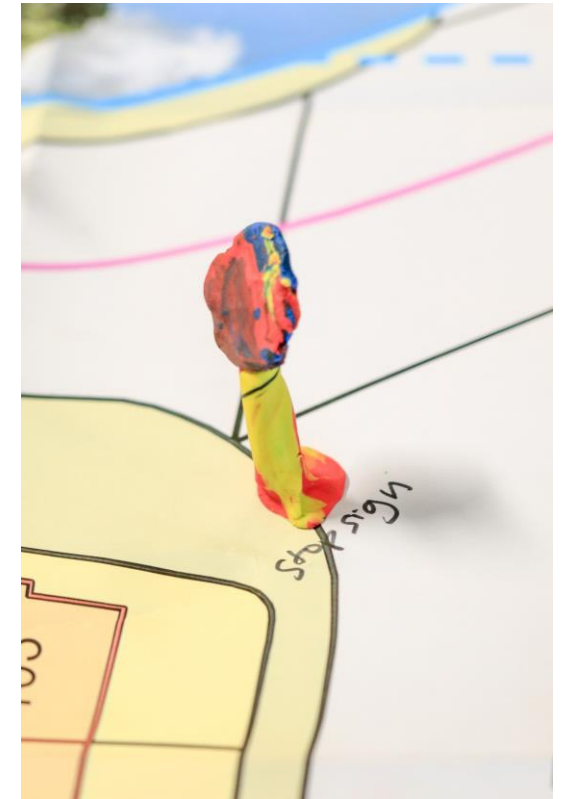

-73% dintre parinti traiesc pe o raza de 3.5 km

-28% ar prioritiza trotuare mai largi, apoi 25% ar dori mai putine masini in apropierea scolilor

### 3. Despre strazi

**Siguranta prin design este de preferat, dar cum putem limita numarul masinilor prin design-ul orasului?**

### 3. Despre strazi

Experimentele sunt
